

Release Notes 2.5.1

October 17, 2005

The following items have been moved (migrated) to Production for use by Agencies beginning on October 17, 2005.

- A fix was made to the Non SF-50 interface so that it passes the correct FEHB pre-tax indicator to DFAS. When an employee is hired and health benefits haven't been keyed, we will send the post-tax option as the default. If the hire action is passed with health benefits, then the correct FEHB plan will be sent to DFAS.
- A fix was applied to job code and position data. Agencies who share job codes will no longer have problems with employee position data populating with information from another agencies job code.
- The action codes DET and EDT were inactivated.
- The following duty station codes were loaded effective 10/7/2005:
